

AURORA: ***The wonder of the Northern Lights***

An “aurora” is one of the most beautiful sights in the night sky. Like phantoms in outer space, aurora can appear out of nowhere and then vanish in a blink. What causes auroral displays? How often do they appear? What is the best time of year to observe them?

Discover the richness of ancient lore that sought to understand the aurora and the amazing science that explains it.

Main concepts covered:

- Nordic and Indian mythology
- Electromagnetism
- Solar physics
- Atmospheric Gases
- Sunspot cycle

Show length: 32 minutes
Suggested ages: 10 - adult
